SAFETY DATA SHEET

1. Identification
Product identifier Ammonia, anhydrous
Other means of identification
  MSDS Number KF_NH3_US_EN
  Synonyms Ammonia, 82-00-0, NH3
Recommended use Fertilizer.
Recommended restrictions Use in accordance with supplier's recommendations.
Manufacturer/Importer/Supplier/Distributor information
  Company Name Koch Fertilizer, LLC
  PO Box 2219
  Wichita, KS, 67201-2219
  kochmsds@kochind.com
  1-316-828-7672
Emergency For Chemical Emergency
  Call CHEMTREC day or night
  1.800.424.9300
  Mexico - 1.800.681.9531
  Outside USA/Canada
  1.703.527.3887
  (collect calls accepted)

2. Hazard(s) identification
Physical hazards Flammable gases Category 2
  Gases under pressure Liquefied gas
Health hazards Acute toxicity, oral Category 4
  Acute toxicity, inhalation Category 3
  Skin corrosion/irritation Category 1B
  Serious eye damage/eye irritation Category 1
Environmental hazards Hazardous to the aquatic environment, acute hazard Category 1
OSHA defined hazards Not classified.
Label elements

Signal word Danger
Hazard statement Flammable gas. Contains gas under pressure; may explode if heated. Harmful if swallowed. Toxic if inhaled. Causes severe skin burns and eye damage. Very toxic to aquatic life.
Precautionary statement
  Prevention Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not breathe gas/mist/vapors/spray. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling. Use only outdoors or in a well-ventilated area. Wear protective gloves/clothing and eye/face protection. Wash thoroughly after handling. Avoid release to the environment.
Response
Leaking gas fire: Do not extinguish, unless leak can be stopped safely. Eliminate all ignition sources if safe to do so. If swallowed: Rinse mouth. Do NOT induce vomiting. Call a poison center/doctor if you feel unwell. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. If inhaled: Remove person to fresh air and keep comfortable for breathing. Immediately call a poison center/doctor. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Collect spillage.

Storage
Protect from sunlight. Store in a well-ventilated place. Keep container tightly closed. Store locked up.

Disposal
Dispose of contents/container in accordance with local/regional/national/international regulations.

3. Composition/information on ingredients

<table>
<thead>
<tr>
<th>Substances</th>
<th>Chemical name</th>
<th>Common name and synonyms</th>
<th>CAS number</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ammonia</td>
<td></td>
<td></td>

</tbody>
</table>

Composition comments
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

This Safety Data Sheet is not a guarantee of product specification or NPK value(s). NPK content is on specified sales orders, customer invoices, or product specification sheets obtained from supplier.

4. First-aid measures

Inhalation
Move injured person into fresh air and keep person calm under observation. For breathing difficulties, oxygen may be necessary. If breathing stops, provide artificial respiration. Get medical attention immediately.

Skin contact
Immediately flush with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. If frostbite occurs, immerse affected area in warm water (not exceeding 105°F/41°C). Keep immersed for 20 to 40 minutes. Get medical attention immediately. Chemical burns must be treated by a physician.

Eye contact
Flush thoroughly with water for at least 15 minutes. Get immediate medical assistance. If medical assistance is not immediately available, flush an additional 15 minutes. If frostbite occurs, immediately flush eyes with plenty of warm water (not exceeding 105°F/41°C) for at least 15 minutes. If easy to do, remove contact lenses.

Ingestion
Call a physician or poison control center immediately. DO NOT induce vomiting. If victim is fully conscious, give a cupful of water. Never give anything by mouth to an unconscious person. If vomiting occurs, keep head lower than the hips to help prevent aspiration. This material is a gas under normal atmospheric conditions and ingestion is unlikely.

Most important symptoms/effects, acute and delayed
Contact with this material will cause burns to the skin, eyes and mucous membranes. Cough, shortness of breath, headache, nausea, vomiting.

Indication of immediate medical attention and special treatment needed
Signs and symptoms of CNS depression, confusion and convulsions should be considered in the assessment and treatment of victims of exposure. Be aware that symptoms of lung edema (shortness of breath) may develop up to 24 hours after exposure.

General information
Chemical burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital.

5. Fire-fighting measures

Suitable extinguishing media
Carbon dioxide (CO2). Water. Dry powder.

Unsuitable extinguishing media
Not applicable.

Specific hazards arising from the chemical
Flammable gas - may cause flash fire. Contents under pressure. Pressurized container may explode when exposed to heat or flame.

Special protective equipment and precautions for firefighters
Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace. Chemical protective clothing is needed if contact with vapor or liquid is anticipated.
Fire fighting equipment/instructions
Evacuate area. Cool containers exposed to flames with water until well after the fire is out. Do not get water inside container. Remove pressurized gas cylinders from the immediate vicinity. Close the valve if no risk is involved. Do not extinguish a leaking gas fire unless leak can be stopped. If leak cannot be stopped and no danger to surrounding area allow the fire to burn out. Fight fire from a protected location.

6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures
If leakage cannot be stopped, evacuate area. Avoid contact with cold gas. Avoid inhalation and contact with skin and eyes. In aqueous solution: Avoid contact with spilled material. Wear appropriate personal protective equipment. For personal protection, see section 8 of the SDS.

6.2. Methods and materials for containment and cleaning up
Remove sources of ignition. Beware of the explosion danger. Ventilate well, stop flow of gas or liquid if possible. Allow gas to evaporate. Vapor can be controlled using a water fog. Use water spray to reduce vapors or divert vapor cloud drift. Do not put water directly on leak, spill area or inside container. Collect runoff for disposal as potential hazardous waste. Stop leak if you can do so without risk. In aqueous solution: Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Prevent entry into waterways, sewer, basements or confined areas.

6.3. Environmental precautions
In aqueous solution: Avoid release to the environment. Do not contaminate water.

7. Handling and storage

7.1. Precautions for safe handling
Avoid inhalation and contact with skin and eyes. Do not get in eyes, on skin, on clothing. Do not breathe gas. Use only with adequate ventilation. Open valve slowly. Ensure that cylinders are not exposed to heat. When using, do not eat, drink or smoke. Do not pressurize, cut, weld, braze, solder, drill, grind or expose empty containers to heat, flame, sparks, static electricity, or other sources of ignition; they may explode and cause injury or death. Observe good industrial hygiene practices. Avoid containers, piping and fittings made of brass, bronze or other copper containing alloys or galvanized metals. Avoid using containers, pipes and fittings made of zinc-clad or copper bearing alloys.

7.2. Conditions for safe storage, including any incompatibilities
Compressed gas storage. Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Store in a cool and well-ventilated place. Secure cylinders in an upright position at all times, close all valves when not in use. Secure cylinders from falling or being knocked over.

8. Exposure controls/personal protection

8.1. Occupational exposure limits

</tbody>
</table>

Biological limit values
No biological exposure limits noted for the ingredient(s).

Exposure guidelines
Follow standard monitoring procedures.

Appropriate engineering controls
Provide adequate general and local exhaust ventilation. Observe Occupational Exposure Limits and minimize the risk of inhalation. If engineering measures are not sufficient to maintain concentrations of dust particulates below the Occupational Exposure Limit (OEL), suitable respiratory protection must be worn. An eye wash and safety shower must be available in the immediate work area.

Individual protection measures, such as personal protective equipment

Eye/face protection
Wear approved, tight fitting indirect vented or non-vented safety goggles where splashing is probable. Use of full face respirator with a canister or cartridge approved for NH3 is best practice.
Skin protection

Hand protection
Wear appropriate chemical resistant gloves. Thermally protective gloves are recommended. Suitable gloves can be recommended by the glove supplier.

Other
Wear appropriate chemical resistant clothing to prevent any possibility of skin contact.

Respiratory protection
If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Selection and use of respiratory protective equipment should be in accordance with OSHA General Industry Standard 29 CFR 1910.134; or in Canada with CSA Standard Z94.4. Respirator type: Chemical respirator with specific cartridge and full facepiece providing protection against the compound of concern. Seek advice from local supervisor.

Thermal hazards
Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations
Handle in accordance with good industrial hygiene and safety practice. When using, do not eat, drink or smoke. Wash hands after handling.

9. Physical and chemical properties

Appearance
Physical state
Gas compressed, liquefied.
Form
Compressed liquefied gas.
Color
Colorless.
Odor
Pungent. Irritating.
Odor threshold
5 ppm
pH
11.7 approximate (1% aqueous solution)
Melting point/freezing point
-30.82 °F (-34.9 °C) (20% solution)
Initial boiling point and boiling range
-28.12 °F (-33.4 °C)
Flash point
Not available.
Evaporation rate
Not available.
Flammability (solid, gas)
Not available.
Upper/lower flammability or explosive limits
Flammability limit - lower (%)
16 %
Flammability limit - upper (%)
28 %
Explosive limit - lower (%)
Not available.
Explosive limit - upper (%)
Not available.
Vapor pressure
124 psi @ 20 °C (68 °F)
Vapor density

Decomposition temperature
Not available.
Viscosity
0.27 cP @ -34 °C
Other information
Bulk density
620 kg/m³ @ 16 °C
Molecular formula
N-H3
Molecular weight
17.03 g/mol
Percent volatile
100 %

10. Stability and reactivity
Reactivity
Contact with acids will cause evolution of heat.
11. Toxicological information

Information on likely routes of exposure

**Inhalation**
Toxic by inhalation.

**Skin contact**
Causes skin burns.

**Eye contact**
Causes serious eye damage.

**Ingestion**
This material is a gas under normal atmospheric conditions and ingestion is unlikely.

Symptoms related to the physical, chemical and toxicological characteristics
Contact with this material will cause burns to the skin, eyes and mucous membranes. Cough, shortness of breath, headache, nausea, vomiting.

Information on toxicological effects

**Acute toxicity**
Toxic if inhaled. Harmful if swallowed. Contact with liquefied gas can cause damage (frostbite) due to rapid evaporative cooling.

**Skin corrosion/irritation**
Causes severe skin burns. Contact with liquefied gas might cause frostbites, in some cases with tissue damage.

**Serious eye damage/eye irritation**
Causes severe eye damage. Direct contact with liquefied gas may cause eye damage from frostbite.

**Respiratory or skin sensitization**
Respiratory sensitization
No data available.

Skin sensitization
No data available.

Germ cell mutagenicity
No data available.

Carcinogenicity
This product is not considered to be a carcinogen by IARC, ACGIH, NTP, or OSHA. Not classified.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)
Not listed.

Reproductive toxicity
No data available.

Specific target organ toxicity - single exposure
No data available.

Specific target organ toxicity - repeated exposure
No data available.

Aspiration hazard
Not available.

Further information
Be aware that symptoms of lung edema (shortness of breath) may develop up to 24 hours after exposure.

12. Ecological information

Ecotoxicity
In aqueous solution: Very toxic to aquatic organisms.

<table>
<thead>
<tr>
<th>Components</th>
<th>Species</th>
<th>Test Results</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ammonia (CAS 7664-41-7)</td>
<td>Aquatic</td>
<td></td>

<td>Chinook salmon (Oncorhynchus tshawytscha)</td>
</tr>
</tbody>
</table>

Persistence and degradability
Not relevant.

Bioaccumulative potential
Not relevant.

Mobility in soil
Not available.

Mobility in general
The Gas will disperse in the air.
### Other adverse effects

None known.

### 13. Disposal considerations

**Disposal instructions**
The packaging should be collected for reuse. Disposal recommendations are based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

**Hazardous waste code**
D002: Waste Corrosive material (pH <=2 or =>12.5, or corrosive to steel)

**Waste from residues / unused products**
Dispose in accordance with all applicable regulations.

**Contaminated packaging**
Since emptied containers may retain product residue, follow label warnings even after container is emptied.
